

# ICYNENE<sup>®</sup> / 75 CLASSIC

OPEN CELL SPRAY FOAM

Greater R-Value and More  
Controllable Rise than  
Standard Open Cell

**HUNTSMAN**  
BUILDING SOLUTIONS

**Icynene® Classic 75** is a high performance open cell spray foam insulation technology that is designed to achieve R-20 in walls and roof decks. This increased R-Value reduces the need for trimming and letting installers complete jobs more quickly and efficiently.

Icynene Classic 75 allows installers to have a more productive job site with improved spraying techniques and cohesions while allowing them to meet or exceed regional and national building code requirements. Achieve a more controllable rise and greater cohesion between lifts while eliminating air pocketing.

## PRODUCT FEATURES

- Superior R-Value
- No additional ignition barrier required\*
- More controlled spray
- Wide temperature range, suitable for application in any climate
- Achieve regional and national building codes requiring a high R-Value

<b>R-Value</b>	R-4 @ 1" R-14 @ 3.5"
<b>Density</b>	0.7 lb/ft <sup>3</sup>
<b>Air Permeance</b>	< 0.02 L/s.m <sup>2</sup> @ 2"

\*An ignition barrier is not required if the attic meets end use configuration.
