BUILDING SOLUTIONS

PROVIDING LOW DENSITY
AND HIGH YIELD

FOAM-LOK™ 450

OPEN-CELL SPRAY FOAM

FOAM-LOK™ 450

OPEN-CELL SPRAY FOAM

FOAM-LOK 450 is an open-cell spray foam insulation technology that is installed in attics, crawl spaces, and interior spaces with no ignition barrier required. Its high yield, low density, low VOC properties make it a contractor's first choice.

Additional benefits of FOAM-LOK 450 include noise attenuation and significant reduction in unmanaged moisture. Additionally, the product's ability to tightly seal the envelope reduces temperature fluctuations and the presence of hot and cold pockets inside, greatly enhancing indoor comfort and providing energy savings.

YOUR OPTIMAL SOLUTION FOR...

- Improving energy efficiency
- Reducing the risk of condensation
- Proven durability
- Maintaining consistent temperatures
- Minimizing unwanted exterior noise
- Excellent adhesion and cohesion
- 2 hour re-entry and 8 hour re-occupancy
- No additional ignition barrier required
- New construction and retrofit applications

FOAM-LOK 450 is well-suited for new construction and retrofit applications in both residential and commercial buildings. FOAM-LOK 450 provides added value over traditional insulation, acting as an air, moisture and thermal barrier, and the product's excellent adhesion ensures that the insulation remains in place.

WHY FOAM-LOK™ SPRAY FOAM INSULATION?

It is essential to any home or building to eliminate air infiltration, control moisture and maintain consistent temperatures while reducing energy costs. FOAM-LOK 450 Spray Foam Insulation effectively seals the building envelope, filling in any cracks and crevices.

FOAM-LOK 450 Spray Foam Insulation technology is an effective insulation system to seal, protect and insulate structures. FOAM-LOK 450 spray foam insulation is a fully adhered seamless barrier against the harshest environments.
