Spray Foam In Commercial Design

Presented by Huntsman Building Solutions

**AIA ACCREDITED
EARN 1 SD/HSW CREDIT**

Course Description

Attendees of this one hour spray foam education course will receive one SD/HSW credit. You will discover the non-residential use of spray foam as an insulation and air barrier, and be introduced to various assemblies. Discussion will also include building code requirements including ASHRAE 90.1, NFPA 285 compliance, the value of continuous insulation, and the advantages of spray foam. Lunch is provided by Huntsman Building Solutions.

To Set Up A Course

Contact the Huntsman Building Solutions Building Science Department at 855-942-7273 or HBSBSE@huntsmanbuilds.com.

Course Learning Objectives

1. Describe the effect of the building code on spray foam insulation
2. Describe the effect of spray foam insulation on the indoor environment
3. Explain the impact of spray foam on a building's energy performance.
4. Explain the life cycle analysis of spray foam and payback periods.
